

UI Improvement Recommendations for Patient CRM

Date: November 28, 2025

Based on: User feedback and screenshot review

✓ What's Been Implemented

1. Enhanced Dashboard View

- ✓ **Quick Stats Bar** at the top showing counts across all workflow stages
 - Accessioning, Accepted, Rejected, At Lab, Resulted, Billed, Paid
 - Visual at-a-glance overview of your entire operation
 - ✓ **Advanced Filtering System**
 - Filter by Patient Status (Claim Pending, Billed, Paid, etc.)
 - Filter by Workflow Stage (Accessioning, At Lab, Resulted, etc.)
 - See counts in dropdown options
 - Clear filters button
 - ✓ **Color-Coded Patient Cards**
 - Left border color indicates critical status:
 - Red: Rejected samples
 - Orange: Accessioning in progress
 - Blue: Shipping stage
 - Purple: At lab
 - Green: Completed/Paid
 - ✓ **Complete Workflow Visibility**
 - Each patient card shows ALL workflow statuses:
 - Kit shipment status (📦 Shipped, Delivered, Returned)
 - Accessioning status (🔍 Pending, ✓ Accepted, ✗ Rejected)
 - Lab status (🧪 At Lab, Resulted)
 - Billing status (💰 Billed, ✓ Paid)
 - Summary badges showing counts (e.g., "3 Accessioning", "2 At Lab")
 - Individual test breakdown with all statuses visible
 - ✓ **Critical Status Alerts**
 - Prominent badge showing most urgent status per patient
 - Example: "🔔 Rejected" or "🔔 Accessioning"
-

Additional UI Improvement Suggestions

1. Dashboard Organization

A. Navigation Tabs Instead of Multiple Pages

Current: Patients, Reports, Import are separate pages

Suggested: Keep main navigation, but add quick-access tabs within sections

Benefits:

- Less clicking between pages
- Keep context when switching views
- Faster workflow

Implementation:

Dashboard

[Overview] [Active Cases] [Accessioning Queue] [Billing Queue]

Patients

[All Patients] [New Patients] [Follow-ups] [Denied Claims]

B. Action-Based Dashboard Views

Create role-based quick views:

1. **Accessioning View** (for lab staff)
 - Only show patients with kits received
 - Quick Accept/Reject buttons
 - Sample quality notes field
 2. **Billing View** (for billing staff)
 - Only show resulted tests
 - Quick claim submission
 - Insurance verification status
 3. **Follow-up View** (for managers)
 - Only show denials and partial payments
 - Resubmission tracking
 - Days since last action
-

2. Color & Visual Hierarchy

A. Status Color Consistency

Implement across ALL components:

- Red/Urgent:
 - Rejected samples
 - Denied claims
 - Overdue actions (>7 days)
- Yellow/Warning:
 - Accessioning in progress
 - Pending verification
 - Partial payments
- Blue/In-Progress:
 - Kit shipped
 - At lab
 - Claim submitted
- Green/Complete:
 - Accepted
 - Paid in full
 - Results received
- Purple/Secondary:
 - At reference lab
 - Specialty processing

B. Icon Consistency

Standardize icons across the app:

- 📦 = Shipping/Kit
- 🔍 = Accessioning/QC
- 🧪 = Lab Processing
- 📊 = Results
- 💰 = Billing
- ✅ = Success/Complete
- ❌ = Rejection/Denial
- ⚠️ = Warning/Action Needed

3. Reduce Tab Overload

Patient Profile Current Structure:

Overview | Tests | Documents | Activity Log

Suggested Reorganization:

Main View (Combine Overview + Tests)

- └ Patient Info (collapsible card)
- └ Tests with inline workflow
- └ Quick actions sidebar

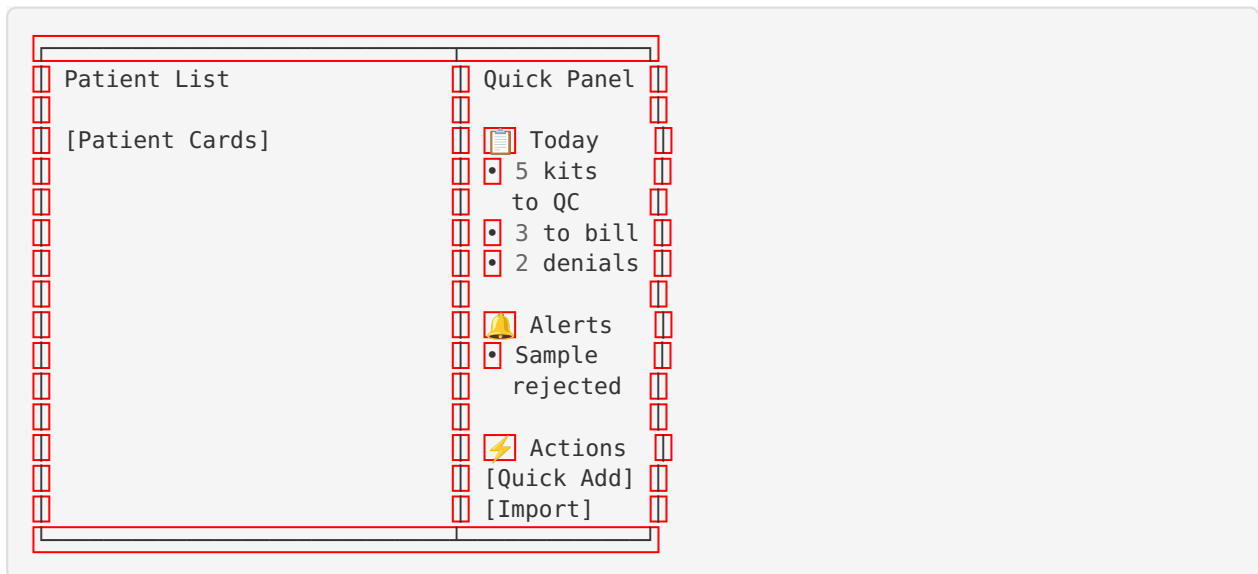

Secondary Tabs

- └ Documents
- └ Activity Log

Benefits:

- See patient info AND tests without switching tabs
- Less clicking
- Faster data entry

4. Smart Sidebar/Quick Actions

Add a persistent right sidebar:**Features:**

- Today's pending tasks
- Critical alerts
- Quick add patient/test
- Recent activity
- Shortcuts to common actions

5. Bulk Actions

Add checkbox selection to patient cards:**Use cases:**

- Accept multiple samples at once
- Bulk print labels
- Export for external lab
- Mass status updates

6. Keyboard Shortcuts

Implement common shortcuts:

/ or Ctrl+K	→	Quick search (focus search bar)
N	→	New patient
A	→	Quick accept (when on test)
R	→	Quick reject (when on test)
E	→	Edit current item
Esc	→	Close dialog/ go back
Ctrl+S	→	Save current form

Add a “?” help icon showing all shortcuts

7. Mobile Responsiveness

Current Status:

Desktop-first design

Recommendations:

- 1. Stacked Layout on Mobile**
 - Single column cards
 - Collapsible sections
 - Sticky action buttons
 - 2. Swipe Actions**
 - Swipe right → Accept
 - Swipe left → Reject/View
 - 3. Bottom Navigation Bar**
 - Fixed bottom nav for mobile
 - Quick access to key functions
-

8. Dashboard Metrics Enhancement

Add Trend Indicators:

Accessioning: 12  +3 from yesterday
At Lab: 8  -2 from yesterday
Billed: 25  No change

Add Time Metrics:

Average Turnaround Times:

- Accessioning: 1.2 days
- Lab Processing: 5.3 days
- Billing: 2.1 days
- Payment: 14.5 days

9. Search Enhancements

Current: Text search only

Suggested:

1. Advanced Search Dropdown

Search by:

- Patient Name
- Medicare ID
- Test Type
- Accession ID
- Date Range
- Insurance Payer

2. Search History

- Recent searches
- Saved filters

3. Smart Suggestions

- Type "rejected" → Show all rejected samples
- Type "today" → Show today's activity
- Type "john" → Show all patients named John

10. Notifications System

Add a notification center:

 (5 unread)

Today:

- Sample G123 rejected - spilled in transit
- Insurance pre-auth required **for** Patient X
- 3 results received from Quest

Yesterday:

- Payment received: \$2,500
- New patient added: Smith, Jane

Features:

- Mark as read
- Filter by type (Alerts, Updates, Payments)
- Email digest option

11. Forms Improvement

Current Test Form:

Multiple tabs with many fields

Suggested:

1. Progressive Disclosure

- Show only essential fields initially
- “Show advanced options” expands more fields

2. Smart Defaults

- Auto-fill common values
- Remember last used values
- Suggest based on patient history

3. Inline Validation

- Real-time error checking
 - Green checkmarks for valid fields
 - Helpful hints below fields
-

12. Printing & Export

Add quick export options:

```
[Export Options ▼]
├ PDF Report (current patient)
├ Excel Export (filtered list)
├ Print Labels (selected patients)
├ Batch Print Requisitions
└ Custom Report Builder
```

13. Dark Mode

Implement a dark theme option:

- Toggle in user settings
 - Reduces eye strain
 - Modern look and feel
-

14. Onboarding & Help

Add contextual help:

1. First-Time User Tour

- Guided walkthrough
- Interactive tooltips
- Sample data to explore

2. In-App Help

- ? icon on each section
- Video tutorials
- Keyboard shortcuts reference

3. Status Explanations

- Hover over any status badge
- See definition and next steps

Priority Implementation Order

Phase 1 (High Impact, Easy Implementation):

1.  Enhanced dashboard with workflow statuses (DONE)
2.  Filtering system (DONE)
3.  Quick stats bar (DONE)
4. Smart sidebar with today's tasks
5. Keyboard shortcuts
6. Print/Export improvements

Phase 2 (Medium Impact, Moderate Effort):

1. Bulk actions
2. Action-based dashboard views
3. Notification center
4. Progressive form disclosure
5. Search enhancements

Phase 3 (Nice to Have, More Complex):

1. Mobile optimization
2. Dark mode
3. Custom report builder
4. Onboarding tour
5. Time metrics and trends

Design Philosophy

Core Principles:

1. **Reduce Clicks**
 - Everything should be accessible in ≤ 3 clicks
 - Common actions should be 1 click
2. **Visual Hierarchy**
 - Most important info = largest/boldest
 - Color = status indication
 - Icons = quick recognition
3. **Progressive Disclosure**
 - Show essential info first
 - Hide complexity until needed
 - Collapsible sections

4. **Consistency**

- Same action = same icon everywhere
- Same status = same color everywhere
- Predictable layouts

5. **Speed**

- Optimize for daily workflows
- Minimize form fields
- Smart defaults

Success Metrics

Track these to measure improvements:

1. **Time to Complete Common Tasks**

- Add new patient: < 2 minutes
- Process accessioning: < 30 seconds
- Submit claim: < 1 minute

2. **User Satisfaction**

- Fewer clicks per task
- Less time searching
- Fewer errors

3. **Adoption**

- Daily active users
- Feature usage rates
- Training time for new users

Summary

Your CRM now has:

- ☒ Complete workflow visibility on dashboard
- ☒ Advanced filtering by status and workflow stage
- ☒ Quick stats overview
- ☒ Color-coded cards for quick scanning
- ☒ All test statuses visible without clicking

Next recommended improvements:

1. **Smart sidebar** with today's tasks (highest impact)
2. **Bulk actions** for efficiency
3. **Keyboard shortcuts** for power users
4. **Better mobile support** if staff use phones/tablets

The key insight: Your workflow is now highly visual and requires minimal clicking to see critical information. The filtering system lets you quickly focus on specific stages of your operation.
